# for people who create

Yes, it's possible that the most difficult aspect of creative work is letting something tangible arise from pure fantasy. Realising ideas the way they're conceived in the mind. And not having to compromise due to materials or workmanship. We at FunderMax wish to add our motto to these thoughts: Nothing is impossible. For whatever you create – we can produce.

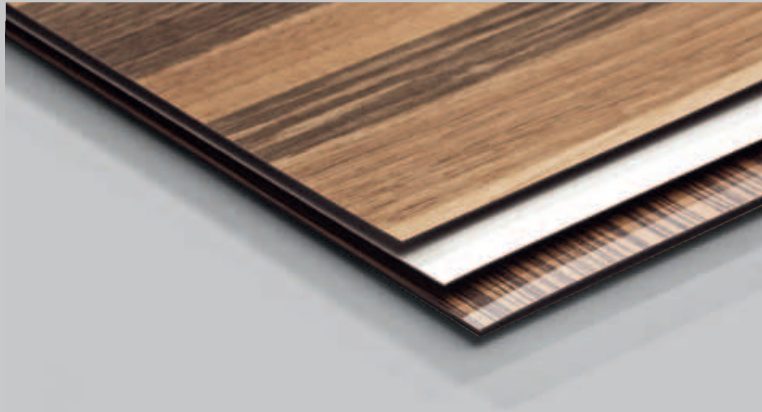

FunderMax offers a broad spectrum of materials for interior use by architects, fabricators and industry. All FunderMax materials have one thing in common: The raw materials and manufacturing processes are of the highest quality. The decors and surface finishes are coordinated to one another, and entire projects can thereby be developed from a single source. Compact interior panels by FunderMax complete our product range (see our brochure Interior Compact Projects).

FUNDERMAX

## Star Favorit

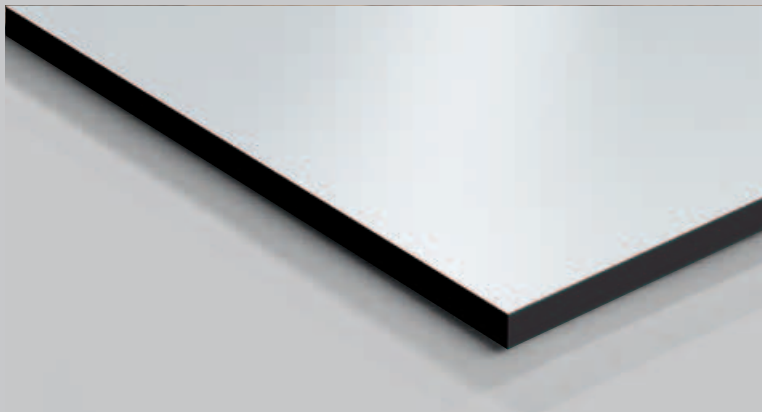

FunderMax Star Favorit panels are melamine resin laminated flat-pressed panels of type MFB made in accordance with EN 14322 and 14323 using E1 – P2 chipboard and resin-impregnated decor films. In their standard version they are made from E1 – P2 chipboard and resin-impregnated decor films. Depending on finish, Star Favorit panels can also be used in damp areas or made heavily inflammable. Star Favorit panels, for interior use, for any type of furniture and fronts in private and commercial areas or in store construction.

FUNDERMAX

## Decorative Laminates

Max Decorative Laminates are duroplastic high pressure laminates (HPL) of types HGS and HGP and made in accordance with EN 438-3. These panels are highly resistant to abrasion, impact and scratching and have a good heat resistance. Various product models in F Quality or with an aluminium insert expand the laminate's areas of application beyond furniture or store construction – such as ship construction or in the door manufacturing industry.

FUNDERMAX

## Compact Interior

Detailed information on our Compact panels can be found in the brochure "Compact Projects" or at [www.fundermax.at](http://www.fundermax.at)

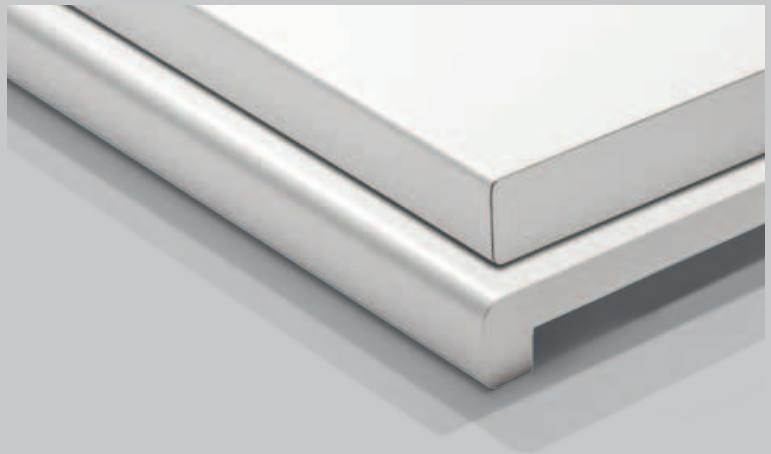

**FUNDERMAX**

## Window Sills

Under the summarizing term “half parts”, FunderMax manufactures worktops and window sills with laminates (HPL) in postforming quality. Max Postforming HGP laminates are duroplastic high-pressure laminates, the same as standard quality, except that they can be postformed round the edge of a basic carrier material when heated. They are mainly used for manufacturing furniture elements. Also available in high-gloss.

**FUNDERMAX**

## Worktops

**FUNDERMAX**

## Biofaser

FunderMax Organic Fibre is a fibre panel produced using the wet method according to the EN 622-2 standard. Thanks to our special manufacturing process, the use of synthetic resins can be avoided almost entirely. Because synthetic resin is avoided, Organic Fibre panels without thoughts are useable. FunderMax Organic Fibre is suitable for surface finishing with melamine resin paper, varnish, film and much more. In its raw state it has a smooth surface on top and a sieve structure underneath.

**FUNDERMAX**

## Homogen

FunderMax Homogen chipboards are bonded wood chipboards made in accordance with the EN 312 classification. Flexibility in sizing, customer-specific qualities and custom-tailored solutions in logistics and service make FunderMax Homogen chipboards a popular starting material for nearly all possible applications in industry and commerce. Surface finishing can be performed with high quality veneers, melamine resin paper, film, laminates (HPL, CPL), via gluing, laminating, short-cycle pressing, postforming, preforming, sheathing, varnishing, and much more.

- \_\_outstanding material mix
- \_\_optimal edge varieties

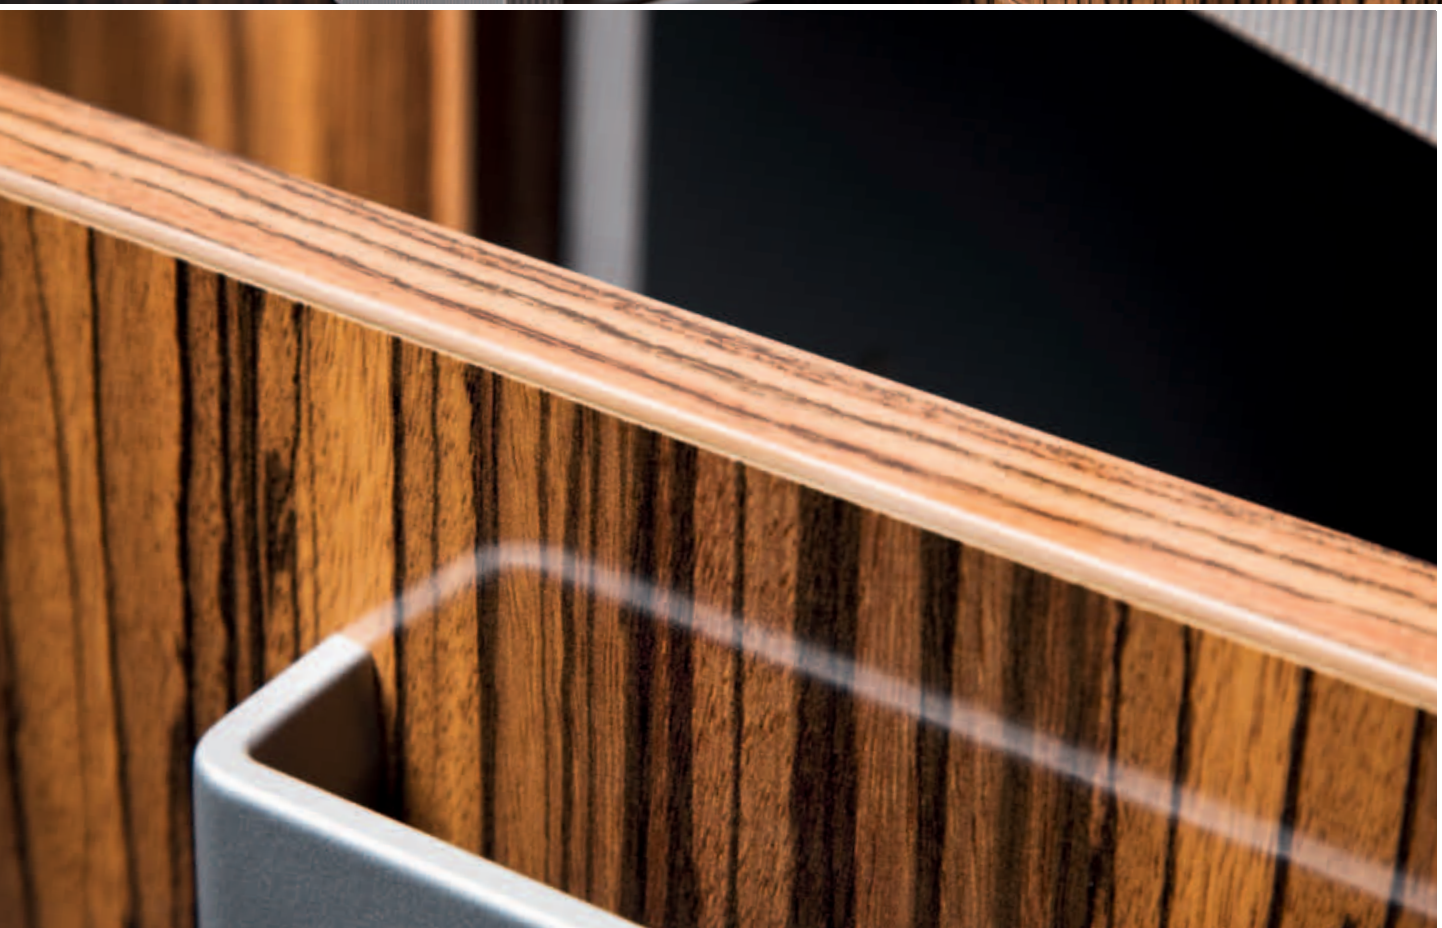

**Open up possibilities.**

Innovative furniture design needs first and foremost to be one thing: personal and free. In spite of this, ideas brought to paper also need to be realised. This is where FunderMax enters into play. Whether you use high-gloss laminate for the top panel or utilise Star Favorit in high-gloss/mirror gloss for the surface and corpus... set the edge and you're finished. Or would you prefer laminate?

- \_\_FunderMax has the right product available for every furniture
- \_\_high-quality fronts for furniture, cabinets, etc.

## Bite- and cut-resistant.

If you want to make an omelette you have to break an egg – or as they say in German, chippings fall where wood is planed. Yet even though there's nowhere where planing, cutting, chopping or carving takes place more than in the kitchen, this saying has to surrender to FunderMax's quality. The resistant surface finishes in HPL quality withstand all of the everyday stresses in the kitchen, even hot pots and pans.

\_\_Laminates in postforming  
quality are outstandingly suited  
for worktops and furniture  
parts with rounded longitudinal  
edges

Turn the light out and the spotlight on. The biggest show highlights only give off little sparks without proper and above all creative light design – and that of course also has to be reflected in the stage design. No problem: Even the most ingenious light show skillfully implements the glossy effects of FunderMax Star Favorit panels and reflect bright, special moments back into the room.

# Set/Exhibition Stand Construction

# Furnishing

- \_\_unified decors
- \_\_unified surface finishes
- \_\_from door gluing to wall cladding

Think about the future.  
FunderMax uses only high-quality raw materials. Research and development are very much tied to environmental optimisation, particularly in the constant improvement of closed material circulations. Thus, all business partners as well as end-users are able to receive a sustainable product, one that corresponds to international standards.

- \_\_protective covers as accessories
- \_\_end caps as accessories

## Free perspective.

True art lies in the details. Thus, apparently ancillary things such as window sills also get the fullest attention – as well as fantasy. Made of the right material, in a suitable colour and with a coherent decor, you can turn a window sill into an elegant room accent or even a resting place in which you can leisurely let yourself gaze into the distance. For a long time too, since the quality and lifespan of the HPL surface finish remains.

- \_\_HPL properties
- \_\_precise printing

Always in motion.

The enthusiasm of finding and developing new ideas must never cease or stand still. This holds especially for the realisation of custom design solutions. FunderMax constantly takes care to improve the efficiency of our processes. Customised decors in laminate quality can thus be made starting with only one piece – and of course in large volumes.

# Hospital Furnishing

\_\_resilient  
\_\_impact resistant  
\_\_easy to disinfect

Work without regard to furniture.

In hospitals, where it literally often comes down to life or death, it's important to pay attention to people, not to furnishings. Where scratches and bumps are everyday events, the interior needs to fit the situation, not the other way around. FunderMax products therefore offer both cost-effective and long-lasting solutions. The corpus and front area of furniture are optimally covered with Star Favorit, while in the wall protective areas, one is well-served with Superfront. Especially demanding projects get laminates or Compact panels.

# Hospital Furnishing

\_\_coordinated colour range

\_\_cost-effective

\_\_long-lasting

**Add colour to life.**

Even in the purely rational domain, several things speak in favour of colour coding: better orientation, etc. Yet colour concepts also improve the grey everyday in the office and public buildings on an emotional level – colours have demonstrably positive effects on the human psyche. The colour range system in the FunderMax plain-colour-collection allow all sorts of different colour coding approaches to be realised in a trouble-free and clear manner.

# Hospital Furnishing
